PROFILE SUMMARY

Motivated Multimedia Computing student at Tshwane University of Technology seeking Work Integrated Learning (WIL) placement in software or mobile development. Passionate about building Android applications and web systems using Kotlin, Java, and modern development practices. Strong foundation in object-oriented programming, UI design, and database integration, with hands-on project experience.

TECHNICAL SKILLS

Programming Languages: Java, Kotlin, JavaScript, C#, SQL

Mobile Development: Android Studio, Jetpack Compose

Web Development: HTML5, CSS3, JavaScript

Databases: MySQL, SQLite

Tools: GitHub, Android Studio, VS Code, NetBeans

Design Tools: Photoshop, Blender

EDUCATION

Tshwane University of Technology (TUT) – Pretoria, Gauteng

Diploma: Multimedia Computing (Computer Science Department)

Status: Currently Studying

RELEVANT MODULES

Advanced OOP (Java), Mobile Computing (Kotlin), Web Development, Database Principles (SQL), Game Programming (C# Unity), Interactive Visual Environments

ACADEMIC PROJECTS

Project 1: Dice Toss Game (Kotlin, Jetpack Compose)

Built a dice toss mobile game using Kotlin and Jetpack Compose, implementing state management, UI updates, and random dice generation logic.

Project 2: Personal Portfolio Website

Link:

Tech Stack: HTML5, CSS3, JavaScript

Developed a responsive portfolio website using HTML5, CSS, and JavaScript, featuring smooth navigation, interactive sections, a project display section, and a downloadable CV feature. Designed to work well on both desktop and mobile devices.

Project 3: Calculator App (Currently in Development)

Tech Stack: Kotlin, Jetpack Compose

Developed a modern calculator application with a clean UI using Jetpack Compose. Implemented arithmetic operations, separated UI and logic layers, and added Navigation to support multiple screens including history tracking.

Project 3: (Currently in Development)

Tech Stack: Kotlin, Jetpack Compose

Developed an order management application that allows users to browse items, create orders, and view order details through a clean and intuitive interface. Implemented multi-screen navigation using Jetpack Compose Navigation and applied data structures to manage and display order information efficiently across different screens.

WIL PLACEMENT INTEREST AREAS

Software Development | Mobile App Development | Web Development | Database Development | Game Development

SOFT SKILLS

Communication | Problem Solving | Teamwork | Time Management | Adaptability | Willingness to Learn
